

BA—ENGINEERING MANAGEMENT OPTION 2008-2009

The Business Administration major - Engineering Management option prepares students who can integrate management skills with engineering skills to solve complex problems in an increasingly technical world. It is designed to prepare students for entry-level engineering-related jobs and to be able to move rapidly into supervisory/management positions.

 *Students may complete this degree within the 120-credit minimum, but they must use courses from the major to complete certain General Education requirements: Ex: BA 253, Econ 262. Using these courses to meet both major and Gen Ed requirements enables the student to complete within the 120-credit minimum. Additionally, students must be aware that the minimal requirements for this option do not fulfill the graduation requirement of 45 upper division credits. Students must ensure that their free electives include sufficient 300- or 400- level courses to meet this requirement.
